## INTRODUCTION

RECASTER is a powerful multicast video stream transmission application designed to facilitate seamless signal transmission from point to multi-point delivery across the globe.

## OVERVIEW

RECASTER is a powerful multicast video stream transmission application designed to facilitate seamless signal transmission from one point on the globe to another. With its versatile features and user-friendly interface, RECASTER empowers users to act as transmitters, receivers, servers, or clients based on their specific requirements. The latest version, 3.0, introduces a range of enhancements and tools to further streamline video transmission processes and provide a comprehensive user experience.

## WHATS NEW IN THIS RELEASE

### DASHBOARD FOR ENHANCED MONITORING

A user-friendly dashboard has been introduced, allowing users to monitor both system health and service health at a glance.

Real-time graphical representations provide insights into the performance of your streaming services.  
Expanded Service Details

### EXPANDED SERVICE DETAILS

Users can now track metrics such as packet loss, packet recovery, and transmitted packets, enabling a more granular understanding of service performance.

### SYSTEM UPTIME

The system uptime feature provides users with valuable information about the duration of continuous system operation, promoting better resource management and reliability planning.

### ALARM SYSTEM INTEGRATION

Users can now receive instant notifications for alarms generated either through individual services or the entire system. This feature ensures prompt attention to potential issues, minimizing downtime.

### COMPREHENSIVE LOGGING SOLUTIONS

RECASTER introduces complete logging solutions for both system and stream activities. This detailed logging capability aids in troubleshooting, auditing, and performance analysis.

For professional services/business/sales, write to us at [mp-sales@planetcast.net](mailto:mp-sales@planetcast.net)

## THUMBNAILS AND STREAM DETAILS

Users can now access thumbnails and detailed information about streams, enhancing the ability to manage and monitor content more effectively.

## ONE STOP PROFILE MANAGEMENT

Simplify your workflow with the new one-stop profile management feature. Users can efficiently manage user profiles, configurations, and settings from a centralized location

RECASTER will elevate your streaming experience by providing unparalleled visibility into your system and services.

Thank you for choosing RECASTER as your transmission solution. We welcome your valuable feedback to help us continue improving and delivering the best possible user experience. Upgrade now and take advantage of the powerful new features in RECASTER.
